

Application No. 10/647,055

AMENDMENTS TO THE SPECIFICATION:

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 7:

Illustrated In U.S. Serial No. 10/408,201, filed April 4, 2003 on Photoconductive Imaging Members, now U.S. Publication 2004/0197686, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a supporting substrate, a hole blocking layer thereover, a photogenerating layer, and a charge transport layer, and wherein the hole blocking layer is comprised of a metallic component and an electron transport component.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 14:

Illustrated in U.S. Serial No. 10/369,816, filed February 19, 2003 on Photoconductive Imaging Members, now U.S. Publication 2004/0161684, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a hole blocking layer, a photogenerating layer, and a charge transport layer, and wherein the hole blocking layer is comprised of a metal oxide; and a mixture of a phenolic compound and a phenolic resin wherein the phenolic compound contains at least two phenolic groups.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 21:

Illustrated in U.S. Serial No. 10/408,204, filed April 4, 2003, entitled Imaging Members, now U.S. Publication 2004/0197685, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a supporting substrate, and thereover a single layer comprised of a mixture of a photogenerator

Application No. 10/647,055

component, charge transport components, and a certain electron transport component, and a certain polymer binder.

Please substitute the following amended paragraph for the pending paragraph beginning on page 3, line 11:

Illustrated in copending application U.S. Serial No. 10/144,147, entitled Imaging Members, filed May 10, 2002, now U.S. Publication 2004/0211413, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a supporting substrate, and thereover a single layer comprised of a mixture of a photogenerator component, a charge transport component, an electron transport component, and a polymer binder, and wherein the photogenerating component is a metal free phthalocyanine.
